Two Structures Homes – Customer Care Process

The path to your dream home at Two Structures is outlined in the info-graphic below. It's simple and straightforward like we like it. It shows you the steps that one takes from shopping for a Two Structures home to making memories in it. At Two Structures Homes, we're making it easy for you to understand what happens from start to finish in the home buying process and how our team will be taking care of your needs.

1. **Pre-Construction Meeting:** At this meeting, you will meet with your home building team. We will walk through your floor plan and set up your selections on Co-Construct. At this meeting, you will also receive your "Homeowner's Guide" that will walk you through the building process to help you better understand the process.

2. **Electrical/Framing Walkthrough:** Together we walk through your new home during the framing stage, go through room by room and select locations for your lighting, cable, and all electrical outlets.

3. **Trim Walkthrough:** During this walkthrough with the trim carpenter you will plan out your closet shelving and discuss any other trim selections you may want.

4. **Home Orientation:** A thorough introduction by your Two Structures Homes site supervisor covering everything you need to know about your new home. At this time, you will be given a Warranty/Maintenance Manual that has all kinds of important information about your new Two Structures home.

5. **60 – Day Follow Up:** We will check in with you either by phone or email just to see how things are going after you have settled in. At this point we will address any warranty items you have collected.

6. **11-Month Walk Through:** At this time you should expect an email or letter advising you that your 1 year warranty will be expiring. Per your request, we will walk-through your home with you to go over any items that may need attention.
